COMPANY INFORMATION

DULHUNTY POWER

INTRODUCTION

Dulhunty Power is a manufacturer and supplier of quality Electricity Transmission and Distribution products. The company has manufacturing plants in Sydney (Australia), Yangzhou (China) and Bangkok (Thailand), as well as sales offices in New Zealand and Hong Kong.

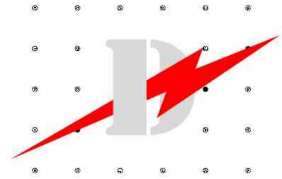

The company supplies its own products to utilities and contractors throughout Australia, New Zealand, China, and the Asia Pacific region. It also supplies components and fittings for a number of European and American companies involved in the electricity transmission and distribution sector.

Dulhunty Power is most well known for its range of vibration control products and its technical capability in measuring and resolving vibration control problems in transmission line applications. The company has invested heavily in developing products and solutions for Aeolian vibration, and is one of the foremost companies in this field in the world.

Apart from manufacturing and selling a large range of its own products, Dulhunty Power also represents a number of other manufacturers, supplying products including glass, porcelain and composite insulators, substation fittings, fault indicators, height meters, tension monitoring systems, switchgear, corona cameras, emergency tower structures, and high temperature conductors.

Dulhunty Power arose from the merger of Dulhunty Industries Pty. Ltd., founded by industry veteran Mr Philip Dulhunty, Dulhunty Engineering Ltd., a Hong Kong-based company and Dulhunty Yangzhou Line Fittings Co. Ltd. (Philip Dulhunty was also the founder of Dulmison more than 50 years ago).

The merger combined the technical and marketing capacity of the Australian company with the low cost manufacturing of the Chinese company, and has opened new markets for both. In its first year of operations, the new Dulhunty Power has greatly expanded its horizons with sales from Australia to Finland and from Morocco to the USA.
